

South Australian Biochar Forum Set to Foster Innovation and Sustainable Practices in Agriculture

Adelaide, February, 2024 – The South Australian Biochar Forum is gearing up to bring together leading experts, innovators, and stakeholders in the agricultural and environmental sectors for a comprehensive dialogue on the transformative potential of biochar.

Scheduled to take place on Thursday, February 29 at The Plant Institute, Auditorium, Urrbrae, this eagerly anticipated forum aims to delve into the multifaceted applications of biochar, exploring its role in revolutionising sustainable agricultural practices, mitigating climate change, and enhancing soil health.

The event will feature a lineup of esteemed speakers renowned for their expertise in biochar technology, environmental sustainability, and agricultural innovation. Attendees can anticipate engaging discussions, interactive workshops, and insightful presentations that shed light on the latest advancements, challenges, and opportunities within the biochar landscape.

With a primary focus on South Australia's agricultural sector, the forum aims to showcase how biochar can be integrated into local farming practices to improve soil fertility, water retention, and carbon sequestration. Participants will gain valuable insights into the economic, environmental, and social benefits of adopting biochar as a sustainable solution in agricultural operations.

"We are thrilled to host the South Australian Biochar Forum, providing a platform for collaboration and knowledge-sharing among industry experts, researchers, and stakeholders," said Melissa Rebbeck, Chair of the peak body, ANZ Biochar Industry Group (ANZBIG). "This event presents a unique opportunity to explore the vast potential of biochar in addressing critical challenges faced by our agricultural communities while advancing towards a more sustainable future."

The forum welcomes farmers, researchers, policymakers, environmental advocates, and industry professionals passionate about harnessing biochar's potential to drive positive change in agriculture and environmental conservation.
