

FOR IMMEDIATE RELEASE

South Australian Biochar Forum: Catalysing Sustainable Solutions for the Built Environment and Decarbonising Heavy Polluting Industries

Adelaide, February 2024 – The South Australian Biochar Forum is poised to be a pivotal platform for driving innovation and fostering sustainable practices within the built environment while spearheading efforts to decarbonise heavy-polluting industries.

Scheduled to convene on Thursday, February 29 at The Plant Research Institute, Urrbrae, this anticipated forum will gather thought leaders, industry experts, and stakeholders committed to exploring the instrumental role of biochar in transforming the built environment and addressing the challenges of decarbonisation in industries.

Amid the urgent need to mitigate climate change, the forum will spotlight biochar's potential applications in construction, infrastructure development, and heavy industries. Through engaging panel discussions, keynote presentations, and interactive workshops, attendees will gain valuable insights into how biochar can revolutionise material sciences, enhance carbon sequestration, and reduce the carbon footprint of various sectors.

"With a focus on the pivotal role of biochar in the built environment and heavy industries, the South Australian Biochar Forum serves as a vital platform to accelerate sustainable solutions," stated Melissa Rebbeck, Chair of the peak body ANZ Biochar Industry Group (ANZBIG). "Our goal is to foster collaboration and innovation, driving the adoption of biochar technologies to pave the way for a more sustainable future across industries that significantly impact our environment."

The forum will delve into case studies, best practices, and the latest research demonstrating how biochar can be integrated into construction materials, wastewater treatment, and energy-intensive sectors to achieve significant reductions in greenhouse gas emissions and overall environmental impact.

Participants, including architects, engineers, policymakers, industry leaders, and environmental advocates, will have the opportunity to explore practical applications, exchange knowledge, and forge partnerships to propel the integration of biochar into the built environment and heavy-polluting industries.

Registration for the South Australian Biochar Forum is now open, to secure a place and take part in this groundbreaking event, interested individuals are encouraged to visit <https://anzbig.org/product/sa-forum/> for more information and registration details.

For media inquiries, sponsorship opportunities, or further details about the South Australian Biochar Forum, please contact CEO, Don Coyne on execdirect@anzbig.org or 0459175729.

Join us at the forefront of innovation and sustainability at the South Australian Biochar Forum, where collaboration meets inspiration, and together, we pave the way for a greener, more resilient future.
